

Recommendation of the Electrical CAE Software EPLAN

To whom it may concern

I hereby wish to inform you that in line with the software standardisation within the Refrigeration Division of GEA and at our partners, that we recommend the engineering software EPLAN for electrical project planning.

This strategic alignment within the Refrigeration Division comes as a result of increasingly international project complexities, the long standing and successful EPLAN experience of our employees, and the large number of EPLAN licenses within the company.

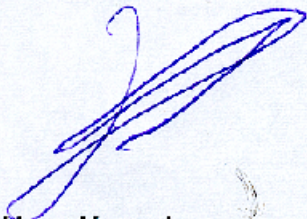

The electrical CAE software, EPLAN, from EPLAN Software & Service (www.eplan.de) is the market leader for software solutions in electrical project planning and has more than 30,000 software licenses installed world-wide.

Furthermore, we are also able to provide you and your employees with an internal EPLAN support service (hotline, consulting), ensuring you optimal support with all your EPLAN inquiries.

Should you require further information, then Mr. Rainer Burgard (Tel. +49 2173 3964 495 or email burgard.r@eplan.de), the EPLAN Key Account Manager for GEA and the mg technologies group or the signatory below will be pleased to assist you.

Yours faithfully,

GEA Grasso International B.V.

Hans Keppel
Group Leader Electrical
